

TRXL SERIES

For Transmission Towers

The latest in Almetek's Transmission product line, the **TRXL Series** is the largest, most durable and cost effective transmission tower numbering system on the market. Available in horizontal or vertical configurations, the plates come in .250" or .50" Co-Extruded UV HDPE with no inks, paints or laminates. The high durability material is virtually impervious to caustic chemicals and withstands even the most extreme environmental conditions. Letters and numbers are available individually or in one-piece sequential plates. Extruded aluminum holders available for 2-8 characters. Custom lengths available.

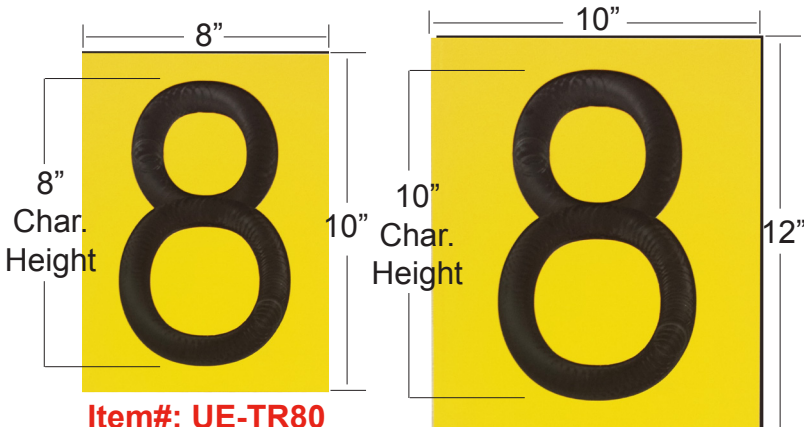

FEATURES

- Warranted for 30 years
- Chemical and extreme weather resistant
- UV HDPE material wont fade, chip, crack or peel
- Highly visible from ground and air
- Cost effective
